PROFESSIONAL SUMMARY

Backend Software Engineer with over five years of experience building enterprise-grade systems, specializing in Java, Python, JavaScript, and modern backend frameworks. Skilled in designing, developing, testing, and deploying scalable backend architectures across the full SDLC. As stated in your document, you bring “hands-on experience designing, developing, testing, and deploying enterprise-grade backend systems” and have strong expertise in Spring Boot, Django, React, React Native, Flutter, and distributed systems.

Currently a Software Engineer at AppGlobal Technologies, where you design secure, high-performance backend services that meet business and regulatory requirements. Your background includes deep experience in digital payments, financial integrations, and healthcare interoperability, including HL7 FHIR, OpenHIE, and DHIS2. You are also proficient with Kafka, Redis, RabbitMQ, and cloud-native architectures.

You collaborate with a multidisciplinary engineering and business analysis team to deliver robust, compliant, and scalable enterprise solutions.

CORE TECHNICAL SKILLS

Languages & Frameworks

- Java (Spring Boot, Spring MVC, Hibernate, Java EE)
- Python (FastAPI, Django)
- JavaScript (Node.js, React)

Backend & Integration

- RESTful APIs, OAuth2, JWT
- Kafka, Redis, RabbitMQ

- WildFly, Tomcat, Apache

Databases

- Oracle, PostgreSQL, MySQL, MSSQL, MongoDB
- Database design, indexing, optimization, replication

DevOps & Cloud

- Docker, Kubernetes
- CI/CD: Jenkins, GitHub Actions, GitLab CI
- Terraform, Ansible
- AWS, Azure, GCP

Other

- Linux/Windows Administration
- Agile/Scrum, Microservices
- Secure Coding, Audit & Compliance

PROFESSIONAL EXPERIENCE

Software Engineer (Team Lead)

AppGlobal Technologies | Aug 2024 – Present

- Led end-to-end SDLC activities including requirements, design, development, deployment, and support.
- Built Java Spring Boot services for healthcare and payment platforms.
- Developed HL7 FHIR-compliant APIs for secure healthcare data exchange.
- Integrated payment gateways and financial APIs with full audit compliance.
- Automated CI/CD pipelines and containerized deployments using Docker and Kubernetes.
- Managed Oracle and PostgreSQL databases for high availability and performance.

- Conducted code reviews, documentation, and team knowledge-sharing. (“Designed and implemented Java Spring Boot backend services...”; “Built HL7 FHIR-compliant APIs...”)
-

Software Engineer / Facilitator

Semicolon Africa | Mar 2022 – Jul 2024

- Developed backend APIs using Java (Spring Boot) and Python (FastAPI).
 - Created system workflows, API documentation, and technical specifications.
 - Deployed containerized applications using Docker, Kubernetes, and GitHub Actions.
 - Mentored engineers on SDLC, backend architecture, and secure coding.
 - Automated cloud deployments on AWS.
-

Software Engineer

Carifika Global | Nov 2020 – Mar 2022

- Built scalable backend systems for e-commerce and digital platforms.
 - Designed and integrated RESTful APIs for internal and third-party use.
 - Implemented secure authentication using JWT and OAuth2.
 - Optimized backend performance and reliability.
-

Web Developer

Musfra Global Resources | 2018 – 2020

- Developed dynamic web applications and dashboards.
- Integrated payment gateways and inventory systems.
- Delivered secure solutions for SMEs.

EDUCATION

- Software Engineering — Semicolon Africa (2022–2023)
- Entrepreneurship & Business Management — Henley Business School, UK (2023)
- SSCE — Federal Government College Maiduguri (2000–2006)

SELECTED PROJECTS

Cloud-Based Payment Processing System

- Designed Spring Boot backend for secure transaction processing.
- Used Redis and Kafka for event-driven workflows.
- Deployed on AWS EKS with Docker and Kubernetes.
- Implemented monitoring, logging, and audit-ready tracking.

Healthcare Interoperability Platform

- Built HAPI-FHIR compliant APIs with OAuth2 security.
- Integrated PostgreSQL backend with analytics dashboards.
- Ensured regulatory compliance and scalability.

ADDITIONAL INFORMATION

- Languages: English, Hausa, Bura/Pabir
 - Work Mode: On-site, Hybrid, or Relocation
 - References: Available on request
